PROFESSIONAL SUMMARY

Results-driven Farm Manager and Agricultural Technologist with practical experience in commercial poultry operations, animal health, biosecurity, flock management, and staff supervision. Experienced in overseeing a flock of 3,500 layers and 2,000 pullets, coordinating vaccination and feeding programmes, monitoring production records, and improving farm performance. Combines agricultural knowledge with developing skills in data analysis, AI tools, digital marketing, and agricultural consulting to support evidence-informed decisions and efficient operations.

CORE COMPETENCIES

Farm Operations: Poultry production, flock management, egg production, feeding programmes, inventory control, farm records, resource planning.
Animal Health & Biosecurity: Animal health monitoring, vaccination programmes, disease prevention, hygiene, biosecurity procedures, animal welfare and nutrition.
Leadership & Business: Staff supervision and training, operational problem-solving, agricultural consulting, communication, time management.
Digital Skills: Data analysis, AI tools for agriculture, digital marketing, data-informed reporting.

PROFESSIONAL EXPERIENCE

Farm Manager | Osy Authority — Port Harcourt, Nigeria

September 2025 – Present

- Direct daily operations for a commercial poultry unit comprising 3,500 layers and 2,000 pullets.
- Supervise and train five farm personnel, supporting consistent work practices and adherence to operating procedures.
- Coordinate vaccination, biosecurity, hygiene, and routine flock-health monitoring to reduce disease risks.
- Track feed inventory, egg-production outputs, and resource use to identify waste and improve operational efficiency.
- Use farm records and production monitoring to support timely decisions and improve flock productivity.

Farm Manager & Animal Health Officer (NYSC) | Alhaji Imafidor Farm

August 2024 – August 2025

- Managed day-to-day poultry and livestock production activities, with attention to animal welfare and nutrition.
- Identified animal-health concerns and supported timely treatment and disease-prevention measures.
- Trained farm workers in animal handling, hygiene, feeding, and routine management practices.
- Contributed to operational improvements associated with an approximately 15% increase in farm productivity, as reported.

EDUCATION

Higher National Diploma (HND), Animal Health and Production Technology — Distinction
Akanu Ibiam Federal Polytechnic, Unwana, Ebonyi State | 2021–2023

National Diploma (ND), Agricultural Technology
Akanu Ibiam Federal Polytechnic, Unwana, Ebonyi State | 2018–2020

PROJECTS & CONSULTING

- Agricultural consulting: Advised local poultry farmers on disease prevention, flock management, and production improvement.
- Data and agri-tech: Applied data-informed thinking to farm production records and operational forecasting.

CERTIFICATIONS

National Youth Service Corps (NYSC) Discharge Certificate; HND in Animal Health and Production Technology.
